The City of Rolling Hills, in cooperation with the Los Angeles County Department of Public Works, encourages education about and programs for the prevention of storm water pollution.

Storm water pollution occurs when, for example, litter, motor oil, paints, fertilizers, pesticides, and animal droppings reside on roadways and are washed into canyons or storm drains. These contaminants mix with rainwater or irrigation water and can flow untreated into the ocean.

TIPS FOR PREVENTING STORM WATER POLLUTION:

- ☐ Put your garbage in the trashcan.
- ☐ Pick up after your dog when out on a walk.
- ☐ Reduce pesticide and fertilizer use; don't over water after application or apply if rain is forecast.
- ☐ Dispose of used motor oil at an oil-recycling center or at a free Household Hazardous Waste/E-Waste collection event.
- ☐ Don't drain your pool or spa into canyons or storm drains.
- ☐ Construct driveways and other outdoor surfaces with pervious material.
